

# MPP SYSTEMS

## Testimonials

March 14, 2003

**MPPE unit offshore NAM K15A (North SEA):**

**(Offshore produced water treatment)**

P. Bothe (Project Manager of NAM): "The good cooperation with

*MPP Systems in this K15A MPPE project has resulted in the desired quality and delivery time".*

May 1, 2003

**MPPE unit Albemarle (Tyrone USA):**

**(Industrial process water treatment)**

Ivan Riggle (Site Compliance Manager Albermarle Tyrone site): "The ability to treat a wide range of hydrocarbons is very important for our site, given that our products, and therefore our process water change quarterly".

September 6, 2005

**5 MPPE units LMBV (German Lausitz and Central Mining Administration Company)**

**(Germany Schwarze Pumpe)**

**(Groundwater treatment)**

Jan Masnica (Project Manager of LMBV): "By using the MPPE technology, it means the groundwater will maintain its original nature when it is treated, only extraction of the poisonous organics takes place and the remaining water environment remains unchanged. This aspect, and the fact that very low effluent levels can be reached, makes the MPPE technology ideal as it enables reinfiltration of the groundwater when it is treated".
